# LAPPS

Control one or several lamps from a **distance** thanks to L'APPS, the connected application. Thanks to a simple and intuitive interface, you can access a **variety of colours**, **adjust the light intensity** and chose the **appropriate effects** for your event.

To adapt the light to your atmosphere, chose between the **Basic or the Expert mode**. Select your colour from a basic range or **create your own composition** with the interactive console.

L'APPS is connected to a **wifi / wireless DMX transmitter** allowing a simplified connexion within all your spaces.

1. **Simple & intuitive**

2. **Wifi & wireless DMX**
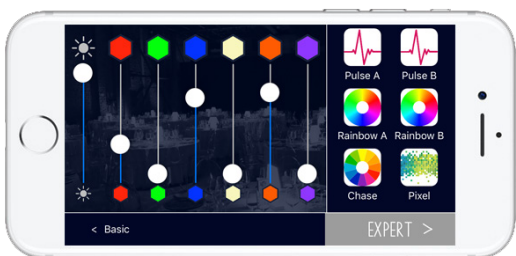

3. **Custom Lighting**

BASIC Mode

The simplicity of the lay-out makes this page accessible to everyone. You will find an overall intensity setting, a range of 9 colours and 3 pre-programmed effects : Pixel, Chase and Rainbow.
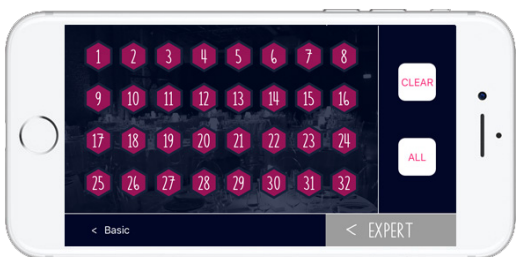

EXPERT Mode

Within this mode, two pages are available.
The **Selection page** allows you to chose the light(s) to set in motion.
The **Settings page** gives access to an interactive console allowing you to vary the colours of the selected lamps, in order to create your own composition. This page also includes a general intensity setting and 6 pre-programmed effects : 2 Pulse, 2 Rainbow, 1 Chase and 1 Pixel.
